

ART & VISUAL CULTURE OF EAST ASIA (HONORS)

Professor Julia Andrews

This honors course is a thematic introduction to the major artistic and cultural trends of East Asia, with a focus on the history of Chinese and Japanese art. We will study major developments and issues in the art of each culture, discussing both cross-cultural artistic flows and the many cultural and artistic differences between cultures in the region. Major monuments of East Asian art and architecture will serve as our primary evidence for explorations of the culture, religions, and history of the region.
